

Inverness

A new way of looking at grass

AESTHETICS

Beautiful new shapes

A unique dark and lime green colour combination on a straw brown thatch with a deep green background. The result is bound to attract admiring glances.

Inverness features a design innovation that means makes the 25 mm pile look great, an innovation stemming from our search for beautiful new shapes.

RECOVERY

Upright architecture

Inverness is manufactured with nylon and features **Instant Recovery**® for the best recovery on the market. Blade architecture with a midrib structure makes this versatile grass. This option is very dense, with its almost 17,000 blades/m². A dense pile and spring-back technology make Inverness an outstanding vertical grass both before and after use.

SENSATIONS

The envy of the neighbourhood

Inverness is manufactured with **Feelgood**®, which keeps the surface cooler on hot days and makes it easier to walk on than other types of artificial grass. When summer temperatures get really hot, this grass stays at a temperature between 7-12°C cooler than other artificial grass. It's bound to inspire envy among your neighbours.

Inverness is beautifully soft and dense, making it lovely and comfortable to walk on. You'll be the envy of the neighbourhood.

GUARANTEES

Our commitment: three written guarantees

1 We guarantee that **Inverness** will keep its colour for at least nine years, but that's not because we have some kind of magic potion. It is because we have done research and selected the best fibres for the products we manufacture. We manufacture with high performance raw materials that withstand the effects of UVA light. What's more, if you follow the maintenance instructions your grass will stay in tip-top conditions for even longer.

2 We guarantee that **Inverness** with Feelgood® by Albergrass has been classed as Cfl-s1 in fire-retardant tests for fire resistant flooring according to UNE EN 13501-12007. What does that mean? It means that the grass you are buying has passed rigorous fire-retardant tests to ensure that it is safe and offers excellent protection.

3 We guarantee that our products are Made in Spain. The demanding Spanish Certificate of Origin proves it.

Albergrass is the first company in this sector to obtain the distinctive OECS: Spanish Origin Certificate. This label certifies the Spanish origin of the Albergrass **Inverness** lawn. To achieve this seal of approval OECS conducts a thorough audit to ensure that the production process is carried out in Spain.

One way to check the quality of the lawn is looking at the finish, the back. That's where everything is united, and so it is important not to bend and jump requebraje. Only a quality latex, such as that used Albergrass allows that everything is connected with high strength and flexibility without cracking or breaking.
