

# Aberdeen II

We wanted to make the best artificial grass even better

## AESTHETICS

Ingredients that add up to better results

Lime green + dark green + olive green with just a touch of oak brown. This is the spectacular cocktail of colours we used to create Aberdeen II grass. A mixture of shades that enhances any setting for a vibrant, cheerful appearance.

The 35 mm pile looks natural and offers very good visual depth. Its height and colour will be the envy of all.

## RECOVERY

1 + 1 = more upright

Aberdeen II grass has midrib structures, a shape that encourages the grass to recover after it has been stepped on. Then there's the nylon pile with its diamond structure. Aberdeen II is designed with **Instant Recovery**® technology that makes it amazingly crush proof. The product is extremely dense, with 19,000 turf fibres/m². Aberdeen II has two structural design elements that keeps the blades upright: one pushes it upwards and the other keeps it erect.

## SENSATIONS

A cool garden

New Aberdeen II artificial grass by Albergrass features **Feelgood**®. This solution keeps artificial grass cooler when temperatures soar, making the surface easier to walk on on hot days. When things heat up in the summer, this grass stays between 7-12°C degrees cooler than other types of artificial grass.

This is pleasant, soft, extra comfortable grass. Lovely underfoot and for lounging, Aberdeen II is a great choice for gardens.

## GUARANTEES

### Our commitment: three written guarantees

**1** We guarantee that **Aberdeen II** will keep its colour for at least nine years, but that's not because we have some kind of magic potion. It is because we have done research and selected the best fibres for the products we manufacture. We manufacture with high performance raw materials that withstand the effects of UVA light. What's more, if you follow the maintenance instructions your grass will stay in tip-top conditions for even longer.

**2** We guarantee that **Aberdeen II** with feelgood® by Albergrass has been classed as Cfl-s1 in fire-retardant tests for fire resistant flooring according to UNE EN 13501-12007. What does that mean? It means that the grass you are buying has passed rigorous fire-retardant tests to ensure that it is safe and offers excellent protection.

**3** We guarantee that our products are Made in Spain. The demanding Spanish Certificate of Origin proves it.

Albergrass is the first company in this sector to obtain the distinctive OEC: Spanish Origin Certificate. This label certifies the Spanish origin of the Albergrass **Aberdeen II** lawn. To achieve this seal of approval OEC conducts a thorough audit to ensure that the production process is carried out in Spain.

One way to check the quality of the lawn is looking at the finish, the back. That's where everything is united, and so it is important not to bend and jump requebraje. Only a quality latex, such as that used Albergrass allows that everything is connected with high strength and flexibility without cracking or breaking.
