

# Libra

The balance of elegance

## AESTHETICS

### Sensual impact

Libra by Albergrass produces an amazingly real visual effect thanks to its perfectly-balanced combination of three shades of green: moss green, lime green and the mint green of the thatch layer.

This variation in tone creates an authentic vibrant natural grass look. A luxurious pleasure for the senses.

## RECOVERY

### It always keeps its shape

Libra by Albergrass synthetic grass is produced with a centre filament. This feature allows it to stand upright and to recover quickly after use, retaining its pleasant soft feel compared with other products of a more linear structure.

## SENSATIONS

### A pleasure to the touch

A garden is to enjoy. To relax your gaze and your spirit. To share with your loved ones. Or perhaps not. Perhaps it is for pleasantly lifting your mood when you are alone. Libra grass is so soft to touch that you will feel the urge to stroke it. Its soft, lush texture invites you to walk on it barefoot. And its dense 38mm pile height makes it soft and springy under foot. It is a pleasure to the touch.

## GUARANTEES

### Our commitment: three written guarantees

**1** We guarantee that **Libra** will keep its colour for at least eight years, but that's not because we have some kind of magic potion. It is because we have done research and selected the best fibres for the products we manufacture. We manufacture with high performance raw materials that withstand the effects of UVA light. What's more, if you follow the maintenance instructions your grass will stay in tip-top conditions for even longer.

**2** We guarantee that **Libra** by Albergrass has been classed as Dfl-s1 in fire-retardant tests for fire resistant flooring according to UNE EN 13501-12007. What does that mean? It means that the grass you are buying has passed rigorous fire-retardant tests to ensure that it is safe and offers excellent protection.

**3** We guarantee that our products are Made in Spain. The demanding Spanish Certificate of Origin proves it.

Albergrass is the first company in this sector to obtain the distinctive OEC: Spanish Origin Certificate. This label certifies the Spanish origin of the Albergrass **Libra** lawn. To achieve this seal of approval OEC conducts a thorough audit to ensure that the production process is carried out in Spain.

One way to check the quality of the lawn is looking at the finish, the back. That's where everything is united, and so it is important not to bend and jump requebraje. Only a quality latex, such as that used Albergrass allows that everything is connected with high strength and flexibility without cracking or breaking.
