

Melange Arena II

The quest for perfection

AESTHETICS

Natural beauty

Melange Arena II grass looks so natural that sometimes you'll forget that it isn't the real thing. Precisely engineered with four colours: brushstrokes of northern sand add body, a touch of dark green for contrast, subtle olive green for a superior finishes to add light and a mint green thatch to give depth to the ensemble.

Melange Arena II features **Natural look®** technology that deflects light and gives the grass a realistic, natural appearance. Technology harnessed to create a superior natural appearance whatever the lighting condition, however you look at it.

The 35 mm pile looks natural and offers great visual depth. Melange Arena II is more than just grass. It is a masterpiece of design and decoration.

RECOVERY

Precision architecture

Melange Arena II is manufactured with nylon and **Instant Recovery®** technology that guarantee the best recovery on the market. The blades of grass should always be upright and to ensure that they are we have designed ours with diamond architecture. This gives grass its own internal spring that sends it back into a vertical position.

Melange Area II is high density grass with almost 17,000 fibres/m², which gives it a great appearance and helps to optimise recovery and keep blades upright.

SENSATIONS

A garden that's soft on the skin

Extremely soft Melange Arena II is unique on the market. You would be hard pressed to find another grass with a texture like this. That's why there's nothing quite like Melange Arena for lounging areas, swimming pools, spas and on terraces. It's your number one choice if you want artificial grass that feels good in contact with your skin.

Grass for lying on, sitting on, and walking barefoot. Soft grass in your garden that feels good against your skin. Don't make the mistake of thinking that soft means delicate, because Melange Arena II isn't just soft... it's as tough as all our options.

GUARANTEES

Our commitment: three written guarantees

1 We guarantee that **Melange Arena II** will keep its colour for at least nine years, but that's not because we have some kind of magic potion. It is because we have done research and selected the best fibres for the products we manufacture. We manufacture with high performance raw materials that withstand the effects of UVA light. What's more, if you follow the maintenance instructions your grass will stay in tip-top conditions for even longer.

2 We guarantee that **Melange Arena II** by Albergrass has been classed as Cfl-s1 in fire-retardant tests for fire resistant flooring according to UNE EN 13501-12007. What does that mean? It means that the grass you are buying has passed rigorous fire-retardant tests to ensure that it is safe and offers excellent protection.

3 We guarantee that our products are Made in Spain. The demanding Spanish Certificate of Origin proves it.

Albergrass is the first company in this sector to obtain the distinctive OEC: Spanish Origin Certificate. This label certifies the Spanish origin of the Albergrass **Melange Arena II** lawn. To achieve this seal of approval OEC conducts a thorough audit to ensure that the production process is carried out in Spain.

One way to check the quality of the lawn is looking at the finish, the back. That's where everything is united, and so it is important not to bend and jump requebraje. Only a quality latex, such as that used Albergrass allows that everything is connected with high strength and flexibility without cracking or breaking.
