

# Orión Plus

Designed to perform

## AESTHETICS

### It's good to look natural

Dark green and lime green on the surface with a straw brown and dark green base. An intense, delicate, subtle colour.

Its 35 mm pile is higher than many of its competitors and it has a firm and even robust appearance. It's so good to look natural.

## RECOVERY

### Good performance at a good price

The midrib structure and curly fibres support the blades for excellent recovery and upright blades. Orión plus is tough and long-lasting and represents excellent value for money.

## SENSATIONS

### Soft and light

Orión Plus is soft to the touch. The tips of the blades are light, giving it a pleasant texture. It is lovely underfoot and is great for walking on, playing or lying down in the garden.

## RECOMMENDED USES

## GUARANTEES

Our commitment: three written guarantees

**1** We guarantee that **Orión Plus** will keep its colour for at least eight years, but that's not because we have some kind of magic potion. It is because we have done research and selected the best fibres for the products we manufacture. We manufacture with high performance raw materials that withstand the effects of UVA light. What's more, if you follow the maintenance instructions your grass will stay in tip-top conditions for even longer.

**2** We guarantee that **Orión Plus** by Albergrass has been classed as Dfl-s1 in fire-retardant tests for fire resistant flooring according to UNE EN 13501-12007. What does that mean? It means that the grass you are buying has passed rigorous fire-retardant tests to ensure that it is safe and offers excellent protection.

**3** We guarantee that our products are Made in Spain. The demanding Spanish Certificate of Origin proves it.

Albergrass is the first company in this sector to obtain the distinctive OEC: Spanish Origin Certificate. This label certifies the Spanish origin of the Albergrass **Orión Plus** lawn. To achieve this seal of approval OEC conducts a thorough audit to ensure that the production process is carried out in Spain.

One way to check the quality of the lawn is looking at the finish, the back. That's where everything is united, and so it is important not to bend and jump requebraje. Only a quality latex, such as that used Albergrass allows that everything is connected with high strength and flexibility without cracking or breaking.
