

Step III

Good value
and practical

AESTHETICS

Four colours for the price of one

Combining shades for a more natural look is the design secret behind Step II grass by Albergrass. Step II is a combination of four colours: two shades of green in the base with touches of straw brown and mint in the thatch.

There's no doubt that these four shades together make for a better appearance - you won't find in any other artificial grass for this price. This grass with its 25 mm pile is ideal for the recommended uses.

RECOVERY

The cheapest "C" in the market

Step II by Albergrass is manufactured with "C" shaped blades with a midrib structure. This helps it to stay upright, which is why it recovers better than other products with more lineal structures. There's no other product with this type of structure and recovery at this price on the market.

SENSATIONS

No doubt about it

There's no question that Step II has a more pleasant texture than other artificial grasses in its price range. It is much softer underfoot than its competitors and gives great results in areas requiring a lower sand load for installation - that means more savings. A great choice, there's no doubt about it.

GUARANTEES

Our commitment: three written guarantees

1 We guarantee that **Step III** will keep its colour for at least seven years, but that's not because we have some kind of magic potion. It is because we have done research and selected the best fibres for the products we manufacture. We manufacture with high performance raw materials that withstand the effects of UVA light. What's more, if you follow the maintenance instructions your grass will stay in tip-top conditions for even longer.

2 We guarantee that **Step III** by Albergrass has been classed as Efl-s1 in fire-retardant tests for fire resistant flooring according to UNE EN 13501-12007. What does that mean? It means that the grass you are buying has passed rigorous fire-retardant tests to ensure that it is safe and offers excellent protection.

3 We guarantee that our products are Made in Spain. The demanding Spanish Certificate of Origin proves it.

Albergrass is the first company in this sector to obtain the distinctive OECS: Spanish Origin Certificate. This label certifies the Spanish origin of the Albergrass **Step III** lawn. To achieve this seal of approval OECS conducts a thorough audit to ensure that the production process is carried out in Spain.

One way to check the quality of the lawn is looking at the finish, the back. That's where everything is united, and so it is important not to bend and jump requebraje. Only a quality latex, such as that used Albergrass allows that everything is connected with high strength and flexibility without cracking or breaking.
