

# Velia 45

Superior response  
to the eye and touch

## AESTHETICS

### Obviously, for this price

This lawn has a height of 45 mm, something quite rare at this price level. The height is the key difference that gives it a lush, attractive and natural look.

The aesthetic of the Velia 45 lawn from Albergrass is based on a dark green contrasting with a lime shade. It looks as natural as a natural lawn. This is how Velia 45 has become the leading artificial lawn in terms of its price/natural appearance ratio.

## RECOVERY

### Decorative and competitive

The Velia 45 lawn is designed with a central core. The fibre together with the central core helps recovery after being trodden. To be honest: this is not the best lawn if you need it to recover quickly after being stepped on. Velia 45 has an average recovery rate. This means that it returns to vertical much better than other lawns in the same price range because those others don't have a central core. This means that it is a decorative lawn that offers a good recovery rate.

This lawn offers the best performance in areas that are not used intensively, spaces without a great deal of pedestrian traffic. For these types of areas, we guarantee that the Velia 45 lawn will be visually very attractive for many years.

## SENSATIONS

### Superior response to the eye and touch

The Velia 45 lawn is softer than any other at this price level. It's a lawn where a lot of attention has been paid to ensure comfort to the touch and the footstep because of its 17,798 stitches/m<sup>2</sup>. The lawn is manufactured with polypropylene to ensure the feeling of a full lawn, a feeling of a lawn that really covers the garden wherever you look, a lawn that offers sensations far beyond its price.

## GUARANTEES

### Our commitment: three written guarantees

**1** We guarantee that **Velia 45** will keep its colour for at least seven years, but that's not because we have some kind of magic potion. It is because we have done research and selected the best fibres for the products we manufacture. We manufacture with high performance raw materials that withstand the effects of UVA light. What's more, if you follow the maintenance instructions your grass will stay in tip-top conditions for even longer.

**2** We guarantee that **Velia 45** by Albergrass has been classed as Dfl-s1 in fire-retardant tests for fire resistant flooring according to UNE EN 13501-12007. What does that mean? It means that the grass you are buying has passed rigorous fire-retardant tests to ensure that it is safe and offers excellent protection.

**3** We guarantee that our products are Made in Spain. The demanding Spanish Certificate of Origin proves it.

Albergrass is the first company in this sector to obtain the distinctive OECS: Spanish Origin Certificate. This label certifies the Spanish origin of the Albergrass **Velia 45** lawn. To achieve this seal of approval OECS conducts a thorough audit to ensure that the production process is carried out in Spain.

One way to check the quality of the lawn is looking at the finish, the back. That's where everything is united, and so it is important not to bend and jump requebraje. Only a quality latex, such as that used Albergrass allows that everything is connected with high strength and flexibility without cracking or breaking.
