

Velia

If you're looking for a good price, but not just any lawn

AESTHETICS

The real and the unreal

A lawn with a height of 35 mm to ensure a real appearance and a good body for the foundation of your garden. The height improves the aesthetic because it doesn't look like a "green carpet".

The aesthetic of the Velia lawn from Albergrass is based on a dark green contrasting with a lime shade. This gives it a more natural, attractive and decorative appearance. This is one of the outstanding features of the lawn; it looks real but comes at an unreal price.

RECOVERY

Let's be honest

The Velia lawn is designed with a central core. The fibre together with the central core helps recovery after being trodden. But to be honest, this one feature doesn't mean we can promise the best recovery after stepping on it. There are other lawns in our product range that guarantee better recovery. So we would say that the Velia lawn has an average recovery rate. This means that it returns to vertical much better than other lawns in the same price range because those others don't have a central core.

Take into account that this lawn offers the best performance in areas that are not intensively used. It's for spaces that do not have much pedestrian traffic. For these types of areas, we guarantee that the Velia lawn will be visually very attractive for many years.

SENSATIONS

Superior response to the eye and touch

The Velia lawn is softer than any other at this price level. It's a lawn where a lot of attention has been paid to ensure comfort to the touch and the footstep because of its 17,798 stitches/m². The lawn is manufactured with polypropylene to ensure the feeling of a full lawn, a feeling of a lawn that really covers the garden wherever you look, a lawn that offers sensations far beyond its price.

GUARANTEES

Our commitment: three written guarantees

1 We guarantee that **Velia** will keep its colour for at least seven years, but that's not because we have some kind of magic potion. It is because we have done research and selected the best fibres for the products we manufacture. We manufacture with high performance raw materials that withstand the effects of UVA light. What's more, if you follow the maintenance instructions your grass will stay in tip-top conditions for even longer.

2 We guarantee that **Velia** by Albergrass has been classed as Dfl-s1 in fire-retardant tests for fire resistant flooring according to UNE EN 13501-12007. What does that mean? It means that the grass you are buying has passed rigorous fire-retardant tests to ensure that it is safe and offers excellent protection.

3 We guarantee that our products are Made in Spain. The demanding Spanish Certificate of Origin proves it.

Albergrass is the first company in this sector to obtain the distinctive OEC: Spanish Origin Certificate. This label certifies the Spanish origin of the Albergrass **Velia** lawn. To achieve this seal of approval OEC conducts a thorough audit to ensure that the production process is carried out in Spain.

One way to check the quality of the lawn is looking at the finish, the back. That's where everything is united, and so it is important not to bend and jump requebraje. Only a quality latex, such as that used Albergrass allows that everything is connected with high strength and flexibility without cracking or breaking.
