

Discover

Irresistible
because it resists

AESTHETICS

Attractive also means more years

With an attractive aesthetic visual game based on the lime green with dark green tones and shades of dark green with straw-colored background. An artificial turf that is attractive at first sight and that lasts for many years with this impressive attractive.

RECOVERY

Many years standing

Discover offers 25 mm high and a good recovery, largely thanks to the use of sports fibers. So one of the secrets of this good artificial turf is to resist many years in good condition, as much as you step on it, it stands up with an optimal verticality after being stepped on.

SENSATIONS

Either for playing or lying down

Discover offers a good feeling after being stepped on and touched. One of those artificial turfs to lie in, play and enjoy.

Furthermore, Discover of Albergrass is antistatic, which avoids any electric charge by wind or friction. Thus this lawn avoids possible annoying "sparks" that may happen on a lawn subject to much friction in crowded areas. Also, it is a permanent antistatic, so it is not a treatment that lasts just a few months.

GUARANTEES

Our commitment: three written guarantees

1 We guarantee that **Discover** will keep its colour for at least nine years, but that's not because we have some kind of magic potion. It is because we have done research and selected the best fibres for the products we manufacture. We manufacture with high performance raw materials that withstand the effects of UVA light. What's more, if you follow the maintenance instructions your grass will stay in tip-top conditions for even longer.

2 We guarantee that **Discover** by Albergrass has been classed as Cfl-s1 in fire-retardant tests for fire resistant flooring according to UNE EN 13501-12007. What does that mean? It means that the grass you are buying has passed rigorous fire-retardant tests to ensure that it is safe and offers excellent protection.

3 We guarantee that our products are Made in Spain. The demanding Spanish Certificate of Origin proves it.

Albergrass is the first company in this sector to obtain the distinctive OEC: Spanish Origin Certificate. This label certifies the Spanish origin of the Albergrass **Discover** lawn. To achieve this seal of approval OEC conducts a thorough audit to ensure that the production process is carried out in Spain.

One way to check the quality of the lawn is looking at the finish, the back. That's where everything is united, and so it is important not to bend and jump requebraje. Only a quality latex, such as that used Albergrass allows that everything is connected with high strength and flexibility without cracking or breaking.
