

# Velia 30

When price and quality are in perfect balance

## AESTHETICS

### Gorgeous

Velia 30 turf by Albergrass attracts the eye by its lime green color combined with touches of dark green; and dark green with brownish straw background. This combination provides a natural and decorative appearance. The color design of a high-end artificial turf applied to a product with a very attractive price.

## RECOVERY

### Good verticality, better look

Velia 30 is an artificial turf with central nerve design. The fiber with the central nerve helps recovery after being trodden. In our product range, you will find other turfs that guarantee better recovery; it is true. But the fact remains that Velia 30 provides a recovery to the tread above the rest of products from other brands with its price level. This is a decorative turf perfect for areas without intensive use.

## SENSATIONS

### The density that can be seen and felt

Velia 30 is an artificial turf we manufacture with polypropylene to ensure a sense of volume and dense turf. This volume is ensuring a sense of thickness to the look and a soft touch above what other brands offer for this price.

## RECOMMENDED USES

Garden	★★★	Attics, terraces and courtyards	★★★
Around pools	★★★	Green areas and Urbanism	★★★★

## GUARANTEES

### Our commitment: three written guarantees

**1** We guarantee that **Velia 30** will keep its colour for at least seven years, but that's not because we have some kind of magic potion. It is because we have done research and selected the best fibres for the products we manufacture. We manufacture with high performance raw materials that withstand the effects of UVA light. What's more, if you follow the maintenance instructions your grass will stay in tip-top conditions for even longer.

**2** We guarantee that **Velia 30** by Albergrass has been classed as Dfl-s1 in fire-retardant tests for fire resistant flooring according to UNE EN 13501-12007. What does that mean? It means that the grass you are buying has passed rigorous fire-retardant tests to ensure that it is safe and offers excellent protection.

**3** We guarantee that our products are Made in Spain. The demanding Spanish Certificate proves it.

Origin

Albergrass is the first company in this sector to obtain the distinctive OEC: Spanish Origin Certificate. This label certifies the Spanish origin of the Albergrass **Velia 30** lawn. To achieve this seal of approval OEC conducts a thorough audit to ensure that the production process is carried out in Spain.

One way to check the quality of the lawn is looking at the finish, the back. That's where everything is united, and so it is important not to bend and jump requiebraje. Only a quality latex, such as that used Albergrass allows that everything is connected with high strength and flexibility without cracking or breaking.

a brand new garden every morning
